JAPANESE ARE TO ENTER ON EAST FRONT

WILL TRY TO PROTECT RESOURCES IN SIBERIA—ALLIES GIVE THEM FREE HAND IN OPERATIONS

Owing to conditions developing in Russia during the past few weeks Japan has decided to take a more active interest in the war.

The invasion of Russia by Germany with the evident intention of taking control of the government so as to have at her command the great resources of that vast nation has created a situation which the Entente must have in mind way.

The major part of the natural wealth of Russia is west of the mountains in Asia, the part generally known as Siberia. This vast Asiatic empire stretches right through to the Pacific Ocean and throughout its length the great Siberian railway traverses. The road is the main source of foodstuff and mineral supply for the large cities of Russia and has been the means of transportation for millions of dollars worth of war supplies which have been sent to Russia and Rumania from Japan, Canada and the United States. At the terminal seaport, Vladivostock, there are at the present time millions of dollars worth of war supplies and at the various towns along the line are other vast stores. Should the Germans gain control of the railroad, there would be nothing to prevent them getting all these supplies as well as other supplies which may be produced in the country contiguous to the railroad. It is with the hope of stopping this that Japan is preparing to enter the conflict in this district, and the Allies have decided to give the Japanese government afree hand in the operations.

Government Now Has 69 Majority

Apart from the Yukon and Nelson, Manitoba, where the election is deferred until April 1, the government as a result of the civilian and soldiers vote has a majority of 69. Should the elections committee of the House of Comons overrule the objection to the soldiers' vote in the Yukon, which would mean the loss of Dr. Thompson, and should Nelson be carried by the government, as is generally expected, the government's majority will be 71. The result by provinces now stands as follows:

	Govt.	Opp.
Prince Edward Island	2	2
Nova Scotia	12	4
New Brunswick	7	4
Quebec	3	62
Ontario	74	8
Manitoba	13	1
Saskatchewan	16	0
Alberta	11	1
British Columbia	13	0
Total	151	82

It is officially stated that 135 members lost their deposits because they did not secure fifty per cent. of the vote cast for their successful opponents. Of these 9 were in Alberta.

Farm Labor Bureau Opened in Calgary

A provincial farm labor bureau will be opened in aCligary on Monday by the provincial department of agriculture with headquarters in room 6 of the Cameron block. A. C. Ross, of Calgary, will be in charge. At this bureau applications will be received from farmers seeking help who will not be required to state how long they will need the help and the wage they want to pay. Laborers will be required to register and give their adaptability and qualifications for farm employment. The aim of the bureau is greater speed in production.

HOW THE BOYS CAN HELP

A novel and practical plan to use school boys to assist in keeping pigs and thus to help in the campaign for increased hog production in Canada has been taken up by the Council of the Hamilton Board of Trade.

Pleasant Pilgrims Invade Many Homes

It is said that if March comes in like a lion it will go out like a lamb and vice versa. As a result many are anxious to see how March will come in. Although this month was ushered in mild enough to resemble a lamb so far as the weather was concerned yet there are those in town who have reason to believe that other elements mustered the strength of the early hours of the month to such an extent as to make a lion look like a pet poodle.

The disturbance was caused by what was at first thought a band of Indians from the big snake-field reserve northwest of town, who had gone out on a rampage. The band visited several homes after the midnight hour but upon close examination it was found they were only a few pale-faces who were out for some innocent fun. Chief Running Rabbit was pushed for but before he arrived on the scene the mistake was discovered and the jovial fun-makers were being treated by their hosts to a swell meal of soda biscuits and water. However, the midnight visitors, evidently did not get their hunger appeased, so they continued their wanderings O're Moore and Fen," looking for the Gibson face in the moon and visiting all their friends from Genesus to Matthew.

It appears the pilgrims got slightly mixed in their dates and that they thought it was the first of April instead of only March.

Chapter of Accidents At the Rolling Mill

There appears to have been a chapter of accidents at he rolling mill during the past week but fortunately none of them were serious. T. J. Andobl, one of the engineers, got a bad knock on the head and had his nose broken by a blow from the shaft of the engine. The same day while Thos. McKelvie was at his work on the machine shop he accidentally got the index finger of his right hand caught in the machinery and it was cut off below the first oint. J. McCleary, who works on one of the rolls, also got his feet slightly burned by coming in contact with a red hot bar of metal.

Although all the wounds are quite painful none are serious, and the unfortunate ones are able to get around again.

The Review Gets Into a Pickle

Last week the Review made a typographical error in setting up the Broadway Department Store ad. We had pickles selling at 30c when they should have been 39c. This meant a big snap in pickles, and naturally there was a big rush at he pickle counter. At first the clerks thought the customers had made a mistake in reading the ad, but on referring to the Review they saw it said 30c for this class of pickles. As the Broadway Departmental Store lives up to its advertised prices and as the Review protects its advertisers for any mistakes it makes, the pickles were sold at he advertised rate and the Review was in the pickle business for a few days.

Will Catch Slackers At the Boundry

With the idea in view that too many eligible young men for military service are slipping out of Canada over the Niagara frontier whose duty it will be to question every man leaving Canada and if he can not show proper credentials he will be refused egress. Afterr he ratification of the treaty citizens of the United States or Canada subject to military service are allowed sixty days in which to return to their own country should they prefer to do so.

The British and French embassies have left Petrograd, according to a telegram from the Russian official news agency in Petrograd, which bears no date.

The High School Hockey Team is Now Champion

The High School Hockey Team went to Medicine Hat last Thursday evening to play off the final in a series of home and home games between the different school teams in the two centres which arranged a schedule early in the winter.

Being the final game, and with the two contesting teams a tie for the honor of champions of the district, great interest was taken in it and excitement ran high.

From the first sounding of the gong to the finish the game was fast, close and exciting but the Redcliff seven nosed under the wire in the last lap with one goal to the good. The score at the finish stood 2-1 in Redcliff's favor.

By winning this game the Redcliff High School Hockey Team now has the proud distinction of being champion of Southern Alberta. Hurrah!

Concert For G.W.V.A. A Great Success

A full house greeted the Scott family of entertainers who appeared in the Amuse-U theatre last Monday evening under the auspices of the Great War Veterans Association.

The company put on a well assorted selection of songs, dances, etc., and rendered them in a manner which was most leasing to the audience.

Pte. R. Everett, one of Redcle's returned veterans, was instrumental in bringing this company to town and as a result of his trouble will be able to hand over a tidy sum to the G. W. V. A., which will go to help furnishing recreation rooms for the association.

Calgary Bull Sale Will Be Largest in World

The bull sale which will be held in Calgary during the horse show, March 26 to 28, will be the largest bull sale ever held anywhere in the world. There will be 845 bulls offered for sale. The next largest sale was that held at Buenos Aires, Argentina, when 800 bulls were sold. The sale held last year, when 470 bulls were disposed of, was the largest ever held in North America.

This year there will be offered 485 Shorthorns, 265 Herefords, 90 Angus, three Galloways and two Red Polls.

Russians to Declare A Holy War Now

Advices from Petrograd indicate that he Bolsheviki councils propose to use the time intervening between signing of the peace treaty with Germany and the date set for its ratification, March 12, to excauate the capital, destroying all stores of provisions and war materials, and possibly to organize a Red Guard army to defend the country against the invaders.

A special cable from the Russian capital dated yesterday, says:

"The peace treaty with Germany, signed at Brest-Litovsk Sunday afternoon is now regarded as only a 'scrap of paper.'

"The highest enthusiasm for fighting is prevalent throughout Petrograd.

"The Petrograd pan-executive council has called an extraordinary session of soldiers peasants and Cossacks for Moscow, March 12, to decide whether to accept or reject peace.

"As a result of the German advance this conference may decide to tear up the treaty and declare a holy war.'

"The movement to reunite all democratic parties for the purpose of fighting defensively to the last is growing."

British Cruiser Sunk by Torpedo

Official announcement was made by the admiralty that the British armed merchant cruiser Calgarian was torpedoed and sunk on March 1st. Two officers and 46 men were lost.

There were 510 persons aboard, nearly 500 of whom have been landed at an Irish port. The Calgarian was struck by four torpedoes.

Presbytery Holds Meeting at Hat

At the meeting of the Medicine Hat Presbytery last Thursday the brethern were greatly surprised to receiv the demission of the charge of St. John's congregation by Rev. J. W. Morrow, M. A. L. L. B. Very strong kind words were spoken of the attachment of his people and his Presbytery to one who has done so much pioneer work for the church. His demission, takes effect at the end of June.

The Presbytery recommends to its people the making an every member canvass for work and funds for the church's needful activities.

Rev. H. T. Keith, of Edmonton, gave an eloient informing address on the foreign missions of the church, showing the lack of men and means, and the immense opportunities for giving the gospel to those who know it not. The Presbytery desires the congregations to be informed of the conditions of our work.

Much routine work for our home missions was attended to, involving grants of over four thousand dollars.

Redcliff Ex Mayor Returns From Front

Capt. E. C. Daniels, who at one time was mayor of this town, but who has been soldiering ever since early in the war, gave his friends here a pleasant surprise last Wednesday by dropping in on them unexpectedly. Capt. Daniels has just returned to Canada on furlough. Although he has seen considerable active service and was wounded, he is still looking and feeling quite natural.

France Will Stay Till Not a Man Is Left

"France has suffered and France is ready to suffer till there is not a man left to suffer. Life to us is valueless if we lose our dignity and liberty and we are willing to die rather than relinquish our rights."

With this testimony of the Frenchman's resolve to fight until the end for the protection of true democracy, M. Stephen Lausanne, editor of the Paris Le aMtin, concluded astirring address before the Toronto Canadian club. Frequently interrupted by loud and prolonged applause, M. Lausanne told of he sacrifices being made by his countrymen and with satire and bitterness he exposed the treachery of the Germans.

"I have always known that France and Canada had much in common," he commenced. "We have the same ideas of liberty and democracy and I now know that we have the same hearts beating for the same cause—the clean blood of a clean heart—and this makes between you and us a link that can never be broken. The Huns 4 centuries ago came to France, and they at least showed pity. ut these Huns—they have killed old men, killed old women, killed little children—they have even killed trees in their lust for killing.

"It is because of this we say, this is not an ordinary war. It is a holy war in which all the Christian nations must join. We are now fighting against a tyranny, a menace, against a power of evil. We are not fighting for money or for territory. We are fighting for an ideal. Prussianism must go. It will only go when the Germans understand that they are not strong, but that hey are weak, that they have not to dictate terms of peace, but to accept them. They will know then that they will have to respect the rights of every nation, strong or weak, big or small.

"I do not need to tell you that there are too many talks of peace. A year ago Germany offered peace. It would have been an everlasting disgrace to the name of France if she had accepted such terms. Today autocracy has found another powerful ally—anarchy. To autocracy and to anarchy we answer today, as we answered yesterday, 'No, you have appealed to the guns, let the guns speak.'"

IRISH LEADER DEAD

John E. Redmond, the Irish Nationalist leader, died Wednesday morning.

Mr. Redmond, who underwent an operation in London last Friday, passed a fair day Tuesday, and apparently was maintaining the progress shown Monday.

Sergt. Robt. Warner Returns to Canada

Sergt. Robt. Warner, one of the pioneers of this town, who enlisted with the 31st battalion, and has been on active service since early in the war returned to Canada last week on furlough, and spent a few days in Redcliff on his way to Calgary. Although he has been through some of the heaviest fighting in the trenches for a long time, Pte. Warner was not hit with any of Fritz's bullets. He had the misfortune, however, to stumble into a shell hole and break his ankle bone.

At present he is looking quite natural and is feeling fairly well considering what he has gone through. He is now in Calgary where he will undergo an examination, when it will be determined whether or not he is fit for further service.

Pte. Warner owns a farms near Taber, which he will visit after he is released from Calgary. He is well known to the old timers of Redcliff, all of whom were glad of the opportunity to welcome him home. His brother, who is also an old Redcliff boy, is still at he front.

Regulations Re Students Employed on Farms

1. Any student classified in Grade XI or Grade XII who has been in regular attendance until March 31st, 1918, at any school conducted in accordance with the School Ordinance and Regulations in that behalf, who produces certificates or other evidence satisfactory to the Minister of Education that he has been regularly employed in farming operations for at least five weeks during the months of April and May, 1918, and who at the regular Departmental Examinations at Midsummer, 1918, obtains twenty-five per cent on each subject or part thereof and forty per cent of the total number of marks assigned, shall receive such diploma as he would have obtained had he passed such examination on the usual basis, provided that the confidential report required from the Principal shall certify that in his opinion the candidate would have been prepared to pass the examination had he continued in regular attendance until the end of the term.

2. Any student classified in Grade IX or Grade X who has been in regular attendance until March 31st, 1918, at any school conducted in accordance with the School Ordinance and Regulations in that behalf, who produces certificates or other evidence satisfactory to the Minister of Education, that he has been regularly employed in farming operations for at least five weeks during the months of April and May, 1918, and who at the regular Departmental Examinations at midsummer, 1918, obtains twenty-five per cent on each subject and forty per cent of the total number of marks assigned, shall receive a certificate of the Principal certifying that he has done satisfactory work up to that date, and would, in his opinion, be prepared to pass the regular Departmental Examination were he to continue in regular attendance until the end of the term, shall receive such diploma as he would have obtained had he passed such Departmental Examination on the usual basis, or, on the recommendation of the Principal may be allowed to proceed to a higher grade with the condition that he be required to satisfy the Department with respect to ne or more subjects which ma." be requested in the prescribed course for such higher grade.

3. Any Grade VIII pupil who has been in regular attendance between October, 1917, and the 31st of March, 1918, at any school conducted in accordance with the School Ordinance and Regulations in that behalf, who produces certificates or other evidence satisfactory to the Minister of Education that he has been regularly employed in farming operations for at least five weeks during the months of April and May, 1918, and who at the regular Departmental Examination at midsummer, 1918, obtains twenty-five per cent on each subject and forty per cent of the total number of marks assigned, shall receive a Grade VIII diploma provided that the confidential statement required from the Principal shall contain in addition to the information required by the Regulations a certificate to the effect that in his opinion the candidate would have been prepared to pass the Public School Leaving Examination on the regular basis had he continued in regular attendance until the end of the term.

Future trading in rye was barred on the Minneapolis chamber of commerce and a maximum price of $2.71 a bushel on outstanding contracts fixed.

LOCAL BAND SURPRISES A BIG AUDIENCE

BY EXCELLENT MUSIC RENDERED AT FIRST CONCERT LAST THURSDAY—WILL NOW GET NEW SUITS.

Probably never before in the history of this town were our citizens more agreeably surprised than they were last Thursday evening when they heard the excellent musical program put on by our citizens band at their first concert given on that evening.

After the playing of the first number, which was a collection of national airs, the audience began to sit up, thow out their chests and compare notes, but as the program proceeded and each succeeding selection was better than the preceding one, an expression of pride and satisfaction was quite visible on every face. Every item was well rendered but the items which brought forth the most applause were "The Oasis" and "It's a Long Way to Berlin." In this latter the band boys sang the chorus, giving added variety to the selections.

Throughout the entire program of band selections Leader Wetton had his men well in hand. The time and shading could not be improved upon and the different instruments were so equally divided and arranged as to make a most harmonious effect.

Although at the present time our band only has seventeen experienced members, the assistance given by a few players from the Hat band made it possible to put on a program which would be a credit to the much larger organizations in our cities. To say that the music was excellent and that it was thoroughly enjoyed by all present is drawing it mild.

During the evening Miss Amelia Timmouth sang "Shadow Time" and so sweetly did she render it that the audience demanded an encore. When recalled she sang Rubenstein's melody in F much to the delight of those present. A vocal quartette by Messrs. D. C. Smith, T. O. Fowler, A. Maskell and J. Hitchen, a solo by D. Martin and a violin and guitar duet by Messrs Harris and Garvin, gave variety to the rogram and all were well received, each demanding an encore.

The hall was well filled for the occasion and we feel sure that never before did an audience leave the hall more satisfied and pleased with the town's talent than on this occasion.

As a result of their entertainment the band cleared $70.45. As this entertainment was given to raise funds to purchase suits for the band the employees of the rolling mills donated an additional $5.00.

We understand the band committee now has sufficient funds on hand to warrant them taking steps to procure the suits and it is their intention to advertise at once for tenders to supply the suits and caps required.

After the program was concluded the chairs were cleared out of the hall and for two hours the young folk were given an opportunity to trip the light fantastic. This also was well managed and thoroughly enjoyed by all present.

FIXED PRICES FOR BRAN AND SHORTS

The Food Controller has fixed the prices for bran and shorts at $24.50 $29.50 respectively, per ton in bulk, f.o.b. Fort William. The prices for feed at western points will be the fixed prices less freight to Fort William. At places west of the points of milling, the prices will be the Fort William fixed prices less freight from the mills to Fort William, plus freight from the point of milling to destination. At Eastern points the prices will be the fixed prices, plus freight from Fort William. The cost in bags will be about $6.90 per ton higher in each case.

Signatures of nearly 8,000,000 women, headed by Mrs. Francis F. Cleveland Preston and Miss Anna A. Gordon, president of the Women's Christian Temperance Union, appeared on a petition presented to President Wilson asking that production of malt liquors in the United States be stopped during the war so the food materials used may be diverted to food supplies.

THE REDCLIFF REVIEW

W. H. HAUCHER, Proprietor
ED. L. STONE, Editor.
Subscription - $1.50 per year

Advertising Rates Furnished on Application.

Issued on Thursday of each week at Redcliff, Alberta.

THURSDAY, MARCH 7, 1918.

WHO WILL DO IT.

The excellent music furnished by the local band at their concert last Thursday evening was a revelation and certainly should be an inspiration to the citizens of the town. With the knowledge now of what our band can do it should not experience any difficulty in getting the necessary support to make it one of the most popular organizations in town.

We understand that arrangements have been made between the officers of our band and the Medicine Hat band to work together during the summer with the object of supplying music for both places. Under the circumstances, when so many band players from Alberta have joined the colors, this idea is a good one and should receive every encouragement. As a result we may expect a number of open-air concerts during the summer evenings. This brings up the question: "Where will they be held?". We have a site set apart for a park. It is conveniently located and with a little work and very little expense it could be made suitable for the purpose. The only question is who is going to undertake the work?

NOW IS THE TIME.

The suggestion of the Calgary Albertan that our legislative methods be amended and rearranged so that a legislative government might have a government measure defeated without having its life endangered and forced to resign is a step in the direction suggested in these columns on several occasions in the past.

The old idea that the defeat of a government measure means a lack of confidence in the government and a consequent appeal to the country is wrong. It is one reason why improperly investigated legislation finds its way into our statute books, and one reason why members of the legislature vote blindly for the party with which they are identified. As it now stands a member will sacrifice his better judgement and his province rather than embarrass his party.

Since there appears to be such a noticeable willingness on the part of the members of our present legislature to throw aside party affiliations and depart from old party customs, what better time than at this session of the legislature to undertake some reform along the lines suggested by the Albertan.

BOYS CAN HELP.

As will be seen by an article in this issue an effort is being made by the Department of Education to get school boys interested in the great production campaign. Arrangements have been made whereby they may go to work on farms during seeding and harvest without losing their standing in their classes. We would advise parents to draw the matter to the attention of the boys. A few months out on the land will do them a world of good both in health and experience to say nothing of the service they will be rendering their country.

In order to help all concerned in this matter the Review will be pleased to assist in bringing the farmers and the boys together. If the boys who desire to help will leave their names at this office we will try to locate them. Farmers wanting boys should also leave their names with us.

HATS OFF TO A. L. SIFTON.

During the campaign prior to the Dominion general election last December men of all political stripes were working day and night for the election of union government supporters. They were not a bit bashful about saying they were tired of party politics, the patronage system, the abuse of political pull and so on, but instead they wanted a good, clean, economic, fearless business-like government, and union government was going to solve the problem.

Since a government is no better and no worse than the people make it, much of the success or failure of union government will depend as much on the people as upon the government. It is a fifty-fifty break. In order to live up to its pre-election promises the government must not allow selfish desires on the part of the people to influence their actions. Neither must the people stand for any mon key business on the part of the government.

Developments of the past few weeks have brought out the fact that the constituency of which Redcliff is a part, has just reason to feel proud of its representatives in the Federal house and to feel satisfied that he is considering his country's welfare rather than his election in the next contest, as has been too often the case in the past.

In an attempt to live up to its pre-election promises to curtail expenses and the appointment of unnecessary officials, the department of the interior in the union government, decided to close up a number of land offices throughout the west. One of these was in Medicine Hat. As soon as this was announced the one-time staunch supporters of economic government in our neighboring city got busy to try to upset the economic plans of the union government. They wrote our influential representative in that government and no doubt urged him to use his influence to have the plan blocked. In answer to this letter Hon. Mr. Sifton said in part:

"I was under the impression that one of the most important and certainly one of the most popular things that were expected of the union government was an effort along the line of economical administration, the closing of unnecessary offices and so far as possible stopping the appointment of unnecessary officials. The department of the interior has made a good start along this line and I should certainly not feel like interfering in their good work."

It is because of the straightforward answer of Mr. Sifton we say we are proud of him and that all his constituents should feel the same way.

Medicine Hat is the largest city in his constituency. It is his headquarters for the riding. The city gave him an overwhelming majority in the last election. In fact it might be said that Mericine Hat elected him. In spite of this fact, however, he says, in effect, in his letter that the government must hue to the line, no matter where the chips fall. If Mr. Sifton had been thinking of getting votes, instead of his country's good, he might have used the old style of answering such letters and said: "I'll give it my serious consideration." But he didn't. He hit from the shoulder. It is because of this we say hats off to Arthur L. Sifton. We need more men like him in all our government bodies.

IT LOOKS REASONABLE.

At a W. C. T. U. convention held in Washington the other day Dr. Hanna Shaw said that now we are having wheatless, heatless and meatless days we should also have smokeless days. She pointed out that if the men on this continent would give up smoking for a day occasionally and send the smokes thus saved over to the boys in the trenches, it would not be necessary for the women to dance, play bridge, have charades, sing and do every other conceivable thing under the sun in order to provide the soldiers with tobacco.

Although we spend our share of time with "My Lady Nicotine" and enjoy it as much as anyone, yet we think there is some good horse sence in what Dr. Shaw says.

If women have to prepare tempting, appetising meals from cornmeal and other substitutes in order that wheat may be conserved for the soldiers, and if they have to do the bulk of the Red Cross and other patriotic work, then the men should curtail their smoking appetites in order that the soldiers' wants should be looked after in this direction.

Down in Ontario a workmen's delegation waited on Premier Hearst and asked that the alcoholic strength of the temperance beer be increased. When the premier told them that no change would be permitted, the report says, boos were heard in the crowd. We always thought "booze" was spelled with a "z" and that it took a singular verb. We will admit, however, that it can sometimes be heard. Otherwise we should have thought the reporter had a few pints of two per-cent tucked under his belt when he wrote up the report of the interview.

Premier Stewart, in an interview in eastern Canada, referred to the government land scheme with the suggestion that the plan would be much more likely to be successful if the government would acquire vacant land at convenient places for land settlement. This is quite correct. No doubt Premier Stewart was thinking of the thousands of acres of land in this district just a stone's throw from the main line of the C. P. R. Here is a chance for Redcliff's representative in the legislature to get busy.

Notices are already being sent around announcing the coming to this town some time this summer of the Chautauqua. As there are a number of citizens in town who have signed a contract for this attraction and as no move has as yet been made by them to get together and arrange a campaign, we would strongly advise that something of this kind be done as soon as possible. Otherwise those who are on the contract stand to lose considerable hard cash.

The way Germany has been dealing with Russia durinr the past few months shows conclusively that the Huns have learned nothing in decency and fairness and have forgotten nothing in brutality and treachery since their earlier experiences with Belgium and Serbia. It is beginning to look like once a Hun always a Hun.

William Jennings Bryan says: "Why not have a few beerless days?" Peaceful William has evidently never heard of Sunny Southern Alberta. Pass the salt please.

The soldier vote has been counted, and the complete report of the election in 1917 shows a government majority of 69, the largest that has ever been recorded by any government in the Dominion of Canada. The verdict of the people is complete. The mandate is clear and the voice of the electors cannot be mistaken.

Western Grain Sent By Panama Canal

With the arrival of the steamer War Viceroy in England at London on Feb. 16 with a cargo of wheat from Vancouver, via the Panama canal, the first stage has been completed in an experiment which may have far-reaching benefits for the great grain producing areas of Western Canada.

In the summer of 1917, Sir eGorge Foster, the minister of trade and commerce, arranged with the British authorities to use the steamer War Viceroy, which was built on the Pacific coast for the British government, to take a trial shipment of wheat to England via the Panama canal. Instructions were, therefore, sent to the board of grain commissioners at Port William to load the steamship and to take every possible precaution that full data should be obtained as to the condition in which the grain was shipped, and for this purpose to send an officer on the voyage, from the grain laboratory of the department, so that from the beginning to he end of the voyage all nformation might be duly recorded. For this purpose electric thermometers were installed in the ship in order to closely watch the grain and make all possible observations in connection therewith.

The grain was sampled at Calgary and placed under laboratory supervision when removed from the elevator to the cars. Samples were again taken at Vancouver as the boat was loading and the moisture subsequently determined on these samples by the laboratory.

The War iViceroy cleared from Vancouver on Nov. 14 last for Nanaimo, whence she sailed on Nov. 16, making a call at Portland. She thus took 92 days to complete the voyage to London from aCnada. She had 100,000 buahels of wheat on board. A full report is expected in due course from the special officers who accompanied this shipment to England.

APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that J. L. Peacock, of Medicine Hat, has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, viz.:

E. of secs. 9, 16 and 21; E. of sec. 6; W. of sec. 9; E. of secs. 8 and 7; N. of secs. 7, 8 and 9; N. of secs. 19, 20, 21 and 22; S. of secs. 6, 5 and 4; all in Tp. 16, Range 5, 4th. W. of secs. 16, 21, 28 and 33, 17, 20, 29 and 32; S. of secs. 30, 29 and 28; S. of secs. 18, 17 and 16, all in Tp. 15, Range 5, W4th.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of this notice.

J. L. PEACOCK.

Dated at Medicine Hat.
February 21, 1918.

All Food Retailers Must Have License

According to new regulations issued by the Food Controller's department it will be necessary for all retail butchers, bakers, produce dealers, flour and feed dealers, fruit and vegetable dealers and fish dealers to secure a license from the food board in order to carry on business. These licenses must be secured before May 15th, otherwise those failing to secure them are liable to a heavy fine and imprisonment.

Already it has been necessary for wholesalers to purchase a license in order to do business, but the new law refers to all retail dealers in the above lines.

Every effort is being made to furnish all wholesalers and retail dealers in food and food products, with forms of application by mail, but any failure to receive such notice will not be deeme da good and sufficient reason for neglect to btaine the necessary license by the dates given above.

SWITZERLAND ISOLATED

By the closing of her frontiers Switzerland again finds herself completely isolated in Europe. Meantime the food question, especially as it relates to bread, is becoming more serious daily. The reserve stocks of wheat, even if the present small ration is still further reduced, will be exhausted within the next six or seven weeks.

ASTOUNDING REPORT FOR REDCLIFF

The wife of a merchant had stomach trouble so bad she could eat nothing but toast, fruit and hot water. Everything else would sour and ferment, ONE SPOONFUL buckthorn bark, glycerine, etc., as mixed in Adler-i-ka relieved me INSTANTLY. Because Adler-i-ka flushes the ENTIRE alimentary tract in relieves ANY CASE constipation, sour stomach or gas and prevents appendicitis. It has QUICKEST action of anything we ever sold. C. T. Hall, Druggist.

DON'T LEAVE REDCLIFF

For anything in our line. We handle pumps, well casing, gasoline engines, Iron Pipe and Fittings, or anything in Sheet Metal from a Water Tank to a Kitchen Sink or a Flue Pipe. We also carry a first class stock of Gas and Plumbing supplies.

Suggestion on the Soldiers Land Question

Editor, Review,
Redcliff.

Dear Sir.—With reference to your article on the opportunity for development of the vacant land adjacent to Redcliff, I am enclosing an article from the Fairfily Herald re the land tanks to returned soldiers. You will note from this that 1,000 applications have already been received by the Soldiers' Settlement Card, and so far mainly from those who were farming previous to the war.

And the article proceeds with a greater problem is presented in finding locations for those who are new to the farming business. The returned soldier does not show a disposition to go to the Peace River country or the hinterlands of the prairie provinces, when millions of acres largely held by speculators are available nearer to civilization and the railways.

This is the whole crux of the situation. The government want these to take up land in some God forsaken part, where a road leads straight to Ponoka. Who is going to spend the best years of his life in some isolated spot for any farm or for the amount a beneficient government wants to hand over? We are in close proximity to a town and railway and we, though used to the life, find it quiet enough without being dumped a thousand miles from anywhere. We have some of the finest land around here anyone could wish, yielding 45 bushels to the acre on an average in 1915. Thousands of acres are lying uncultivated. Traction plows could be put in right at Redcliff station and could plow a furrow 10 miles long without ever touching an iece of cultivated land. In the Harvest aVle S.D. the area is 12930 acres, 8320 have not one soul on. Why do not the government appropriate this land? They have the power and the means. Australia is buying all the land they are getting ready for the soldiers. Is there any reason why the Canadian government cannot buy this? Would it not be cheaper than building a railway into the Peace River country? But I was past forgetting probably some hanger on has stimber limit or tract of land he wants opened up in that country. When one sees the few straggling loads of grain going into Redcliff and to think of the possibilities that Providence has put at our very doors and we are too rotten to take hold of them, one can only come to the conclusion that we are a degenerate bunch if we allow this to continue. Why the paltry little elevator we have in our town is a disgrace and still we call ourselves a progressive people. In the mad rush to get manufacturing industries into our midst we have neglected the most important agriculture. We have allowed the government again and again the privilege of stamdling the time for the Southern Alberta Land Co. to finish their work. Something like 11 years have rolled by and not one acre is under irrigation. Why the apathy on the part of the government? Simply because they know we are indifferent and that here is no co-operation to make them do what hey should. I do not hold with the policy policy of giving a soldier $2,500, and tell him there is your land go and do your duty. In this we are courting disaster. Australia is erecting all improvements, getting the land plowed and giving their boys some cash in addition. This is the only and the correct way. The government could order material by the car load, have it loaded off in close proximity to the land and instead of sending each individual to do his own job, get a dozen soldiers on to each place, get this finished in every detail, that is, erection of buildings and fencing and digging a well, then proceed to the next and so on. By this means an immense saving of time and money would be the result. To those who have had no farming experience these could be put on land adjacent to those who know how to farm, or could be located next to the farmers who have been resident for years, and who I am sure would be only to pleased to instruct them how best to proceed, and to tell how and when to cultivate their land, and in the busy time at harvest they could join up, saving expense of hired help. The land problem seems to me to entail no difficulty. The boys who have gone over to France ready to sacrifice their lives for us deserve of the best we can give them, and I am sure they will appreciate any effort we may put forth in their behalf.

Why not call arousing meeting at Redcliff on this important question. It is in the interest of every farmer and of every consumer to attend and by this means bring the matter bifore the government. If we do not act on our opportunity and at once we can only have ourselves to blame. Hoping Mayor Bott will call a meeting, advertise it fively, so that all can attend. Especially let the War Veterans of Medicine Hat know so they can roll up en masse.

Yours, etc.,
P. H. WEDDERBURN.

How to Send Letters To Enemy Conntries

It has been found that the charge previously stipulated (25c) for the forwarding of correspondence from Canada to enemy and enemy occupied territory through the medium of Thos Cook & Son, Montreal, does not cover the cost of such transmission, and in future the charge for forwarding such correspondence will be 35c per letter.

This amount is to be remitted by means of a Postal Note, together with the letter which is to be forwarded, to Thos. Cook & Son, 530 St. Catherine Street West, oMntreal, in accordance with the instructions which may be obtained on application from Thos. Cook & Son.

All enquiries on this subject are to be made to Thos. Cook & &Son, 530 St. Catherine Street West ,Montreal, who will furnish a copy of the regulations to be observed in sending such correspondence. When writing Thos. Cook & Son a stamped addressed envelope must be enclosed if a reply is desired.

To much attention cannot be paid to pondence, as any item which contravenes these regulations in any way will not be transmitted.

The Best Practice In Potato Culture

Potatoes ,owing to the demands of our Allies for wheat, should occupy a very prominent position as an article of human food. It behooves all who grow them to endeavor to secure as great a yield as possible from any area since the shortage of labor curtails any very increased acreage.

From experiments conducted at the Dominion Experiihental Station, Lacombe, a number of conclusions have been drawn which it is hoped may be of value not only to the farmer, but also to the townsman who grows a small patch of tubers in his back yard.

From May 15th to May 30th, generally speaking, is the best time to plant potatoes. Those planted earlier than this do not yield much, if any, heavier, while they run a greater chance of rotting during a cold spring, or of being frozen if they apear above the ground too early. Planting a month later than the time recommended has reduced the yield one hundred and ninety-three bushels per acre.Seed sprouted in the sunlight for a couple of weeks until short, green sprouts apear at he eyes, has given an earlier and heavier crop than has ordinary planting. This method can be recommended to those who have a limited area and desire to raise a maximum crop. It has been found that cuttings with three eyes from sound, medium-sized tubers give the best results. Rather poor yields may be expected from the use of, small potatoes for seed, and a large proportion of the crop is fond to consist of small, unmarketable tubers. A system of selecting and planting only the best healthy potatoes is bound to give the greatest yields during a number of years.

Examination For Sanitary Inspection

Through the newly appointed Board of Examinations, arranged for examination of returned soldiers taking vocational training, and others who may wish to qualify for positions as assistants in the Inspectoral Departments of the oHard of Health, arrangements have been made to hold examinations for this branch of work, at he Institute of Technology, Calgary, on Tuesday, aMrch 19th and Wednesday, March 20th.

The possession of certificates from the Royal Sanitary Institute will give the men standing anywhere within the British Empire. While the occasion for the examination is the desire of these soldiers to qualify, and other soldier or civilian who can meet the requirements may write on the examination.

Japan Progressing Cautiously in Siberia

It is understood, according to a Reuter dispatch from Tokio, that the Japanese government is extremely well informed of developments in Siberia, but at present is adopting a policy of watchful waiting. Japan , carefully avoiding arousing the antagonism of loyal Russians who, notwithstanding their dire need of assistance appear to be extremely sensitive of outside interference. Recognizing also that China is entitled to consideration as protector of the frontier on which aJpan does not actually border, Japan, the dispatch adds, probably has agreed with China on a plan for prompt co-operation.

The governor of the Province of Sin Kiang, western China, from which have come reports that Turks and Germans are stirring up the Mohammedans, telegraphs that Russians are massing on the frontier, evidently intending invasion of Sin Kiang. The telegram adds that the people are paic-stricken and ask that rifles and amunition be sent to the governmnor.

Sammies are Too Much for the Huns

Again the Germans in Lorraine have attacked the American troops and again they have met with defeat. Notwithstanding the heavy snow and the previous repulses they have met in their attempts to penetrate the American lines, the enemy Monday essayed a surprise attack. The American gunners and riflemen were quickly after them however, and the Germans were forced to beat a hasty retreat. Later, the Americans took the initiative into their hands and sallying forth as a raiding unit penetrated the German positions and brought back a number of prisoners.

Bad weather generally prevails along the western front, but nevertheless the Australians have again raided enemy positions near Warneton, which lies southeast of Ypres, and? taken more prisoners and several machine guns. This was the second adventure of the kind on the part of the Australians in as many days in which the enemy losses have been fairly high.

SAYS ROMANOFF WAS LOYAL TO ENGLAND

Speaking at a dinner in his honor in London, Sir eGorge uchanan, British ambassador to Russia, who is now on leave, took occasion to correct the widespread report that at the time of his abdication Emperor Nicholas was ready to conclude a separate peace. Sir George said there was not a word of truth in this report. Doubtless Nicholas had much to answer for, he remarked, but he would never have betrayed the cause of the allies and was always a loyal friend to England.
